AI / NLP

- IndoBERTtweet
- Hugging Face Transformers
- ONNX Runtime
- Scikit-learn
- Threshold tuning
- Stratified evaluation

DEVELOPMENT

- Python, JavaScript, PHP
- React.js, Node.js, Laravel
- Express.js, Tailwind CSS
- MySQL, Firebase, Supabase
- Docker, Database Architecture

IOT & HARDWARE

- ESP32, Arduino
- pH, MQ-135, Thermocouple
- Firebase integration

LANGUAGES

- Indonesian (Native)
- English (Professional)

Muhammad Bayu Satrio

AI Engineer / Data Analyst · NLP · Analytics · Applied Systems
GEMASTIK XVIII Silver Medalist

PROFESSIONAL SUMMARY

Information Technology student at Telkom University focused on AI engineering, NLP, analytics, and software systems that work in real environments. I build Indonesian NLP models, data-driven workflows, and production-aware systems that connect machine learning with useful software products. My work spans model training, metric-driven validation, backend development, and product thinking — across projects in toxic speech detection, healthcare records, IoT fermentation, and donation platforms.

PROJECTS

Indonesia Toxic Speech Detector

2026

AI Engineer / NLP

github.com/BayuSatrio2804/Indonesia-Toxic-Speech-Detector

- Fine-tuned IndoBERTtweet for binary Indonesian toxic speech classification.
- Built a stratified train, validation, and test workflow with final test metrics reported once.
- Tuned the toxic-class decision threshold on validation data before final evaluation.
- Exported Hugging Face and FP32 ONNX Runtime CPU inference artifacts.

EXPERIENCE

Back-End Web Developer

Aug 2025 – Jan 2026

Bidanku

- Designed relational database schemas for ANC, family planning, deliveries, and immunization workflows.
- Implemented medical business logic for patient LMP and EDD calculations.
- Optimized SQL reporting queries and built audit logging for data modification tracking.

CFO & ICT Business Development

Jun 2025 – Oct 2025

ACETRA (Smart IoT System)

- Monitored pH, temperature, and gas parameters through ESP32 and Firebase integration for coffee husk fermentation.
- Managed strategic financial planning and hardware procurement budgets.
- Connected IoT capabilities with product and business feasibility for GEMASTIK XVIII 2025.

Fullstack Web Developer

2025

DonasiKu Platform

- Built a responsive donation platform with a Laravel backend and React frontend.
- Developed a donation tracking system for live distribution status and operational transparency.
- Integrated real-time chat workflows between donors and recipients.

EDUCATION

Telkom University

Sep 2023 – Sep 2027

Bachelor of Information Technology

Focus: Software engineering, modern computing systems, analytics, and applied information technology.

SMAN 3 Banjarmasin

2020 – 2023

High School Diploma, Science (IPA)

Built a foundation in logical thinking, mathematics, and analytical problem solving.

AWARDS & CERTIFICATIONS

- 2nd Place (Silver Medal) – GEMASTIK XVIII National Level, ICT Business Development
Ministry of Higher Education, Science, and Technology RI — Oct 2025
