

Muhammad Bayu Satrio

Fullstack Web Developer, AI Engineer, IoT Specialist

+6285654429650

bayusatrio0235@gmail.com

Summary

I believe that true innovation is born from the synergy of various technological disciplines. As a practitioner, I focus on integrating smart digital ecosystems leveraging the reliability of Fullstack architecture, the acuity of Artificial Intelligence, and the automation of Internet of Things (IoT). I am strongly committed to designing end-to-end solutions, combining the robustness of highly capable backend logic and cutting-edge data processing to produce intuitive visual interfaces that have a real impact on user experience.

Experience

Back-End Web Developer

Bidanku (Digital Transformation Group)

Aug 2025 — Jan 2026

Led the design of rigorous relational database schemas (ANC, Family Planning, Immunizations). Implemented automated medical business logic for future midwifery clinic medical record systems, including determining patient LMP and EDD. Optimized SQL queries for data aggregation in Monthly Reports and created secure Audit Log systems.

CFO & ICT Business Development

ACETRA (Smart IoT System)

Jun 2025 — Oct 2025

Engineered a smart IoT monitoring system to optimize coffee husk waste fermentation. Managed strategic financial budgets for sensor hardware procurement (pH Sensors, MQ-135, Thermocouples). Analyzed commercial feasibility and bridged technical IoT capabilities with business value (GEMASTIK XVIII 2025).

Fullstack Web Developer

DonasiKu Platform

Jan 2025 — Dec 2025

Engineered a robust donation platform utilizing a Laravel backend and a modern React frontend. Built a Donation Tracking System for live distribution status updates to guarantee operational transparency. Developed a responsive Landing Page to increase interaction and donor trust.

Education

Bachelor of Information Technology, Information Technology, Bandung, 2023 — 2027

Telkom University

Focus: Software engineering pillars, modern computing systems, and innovative IT development.

- Achieved a GPA of 3.76/4.0 throughout the program

High School Diploma, Exact Sciences (IPA), Banjarmasin, 2020 — 2023

SMAN 3 Banjarmasin

Built a strong foundation in logical thinking, analytics, and exact sciences.

Skills

- JavaScript
- PHP
- Go

- **Python**
- **C++**
- **Java**
- **React.js**
- **Vite**
- **Node.js**
- **Express.js**
- **Laravel**
- **MySQL**
- **Database Architecture**
- **Firebase**
- **Supabase**

Achievements

2nd Place (Silver Medal) - GEMASTIK XVIII (National Level) in ICT – Ministry of Higher Education, Science, and Technology RI (Oct 2025)

Certifications and Licenses

2nd Place (Silver Medal) - GEMASTIK XVIII (National Level) in ICT – Ministry of Higher Education, Science, and Technology RI (Oct 2025)
