SUMMARY

Information Technology student at Telkom University focused on AI engineering, NLP, analytics, and software systems that work in real environments. I build Indonesian NLP models, data-driven workflows, and production-aware systems that connect machine learning with useful software products. My work spans model training, metric-driven validation, backend development, and product thinking delivered through projects in toxic speech detection, healthcare records, IoT fermentation monitoring, and donation platforms.

PROJECT

❖ AI Engineer / NLP Jan 2026 — Jan 2026

Fine-tuned IndoBERTweet for binary Indonesian toxic speech classification. Built a stratified train, validation, and test workflow with final test metrics reported once. Tuned the toxic-class decision threshold on validation data before final evaluation. Exported Hugging Face and FP32 ONNX Runtime CPU inference artifacts.

❖ Back-End Web Developer, Bidanku Aug 2025 — Jan 2026

Designed relational database schemas for ANC, family planning, deliveries, and immunization workflows. Implemented medical business logic for patient LMP and EDD calculations. Optimized SQL reporting queries and built audit logging for data modification tracking.

❖ CFO & ICT Business Development, ACETRA Smart IoT System Jun 2025 — Oct 2025

Monitored pH, temperature, and gas parameters through ESP32 and Firebase for coffee husk fermentation. Managed strategic financial planning and hardware procurement budgets. Connected IoT capabilities with product and business feasibility for GEMASTIK XVIII 2025.

❖ Fullstack Web Developer Jan 2025 — Jan 2025

Built a responsive donation platform with a Laravel backend and React frontend. Developed a donation tracking system for live distribution status and operational transparency. Integrated real-time chat workflows between donors and recipients.

SKILLS

IndoBERTweet

ONNX Runtime

Python

PHP

C++

React.js

Express.js

Tailwind CSS

Python Programming

Hugging Face Transformers

Scikit-learn

JavaScript

Go

Java

Node.js

Laravel

Machine Learning

Data Visualization

ACHIEVEMENTS

2nd Place (Silver Medal) - GEMASTIK XVIII National Level, ICT Business Development Ministry of Higher Education, Science, and Technology RI -- Oct 2025

CERTIFICATIONS AND LICENSES

GEMASTIK XVIII Silver Medalist in ICT Business Development

EDUCATION

❖ Telkom University 2023 — 2027

Bachelor of Information Technology

Focus: Software engineering, modern computing systems, analytics, and applied information technology.

❖ SMAN 3 Banjarmasin 2020 — 2023

High School Diploma, Science (IPA)

Built a foundation in logical thinking, mathematics, and analytical problem solving.
